

Our Mission

US Army Corps
of Engineers®
Europe District

A Full Spectrum Engineering Force

- Rapid-response engineering services and contingency planning to support to military and peacekeeping operations. This support includes design, construction, environmental, real estate services and base camp management.
- Department of Defense Contract Construction Agent for new military construction for the U.S. Army and Air Force. Life-cycle project management for Architect Engineers Services and Construction contracts. Host nation contract and construction management for projects for the U.S. forces handled through European governments under NATO Status of Forces Agreements.
- Peacetime planning, design, construction and maintenance activities in support of the U.S. force. This includes infrastructure repair and revitalization support for military bases to support Department of Defense quality of life and modernization initiatives.
- Environmental assessments, protection, pollution prevention and remediation work.
- Civil and humanitarian assistance to friendly foreign governments on behalf of U.S. Embassies and Department of Defense.
- Engineering expertise for peacetime engagement activities with NATO allies and Partnership for Peace Nations sponsored by U.S. European Command.
- Assistance to foreign defense agencies under the Defense Department's foreign military sales program, which permits eligible foreign governments to purchase defense equipment and services including Corps of Engineers design and construction expertise.
